**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

1 -10 (Cancelled)

5                    11.    (Original)    A medical device for distal protection during open surgical  
repair of an aortic aneurysm, comprising:

an elongate member having a proximal end and a distal end;

a first expandable filter mounted at the distal end of the elongate member;

a second expandable filter mounted at the distal end of the elongate member;

10                    a mechanism for expanding the first filter independently of the second filter; and

a mechanism for expanding the second filter independently of the first filter.

12.    (Original)    The medical device of claim 11, wherein the elongate  
member is a wire.

13.    (Original)    The medical device of claim 11, further comprising a  
15 sheath that covers the first and second filters and is removable from the filters by sliding  
proximally.
